SUMMARY

Data Science student at Multimedia University (MMU) specializing in end-to-end machine learning and predictive analytics. Developed a computer vision system for deepfake detection and dialect-aware NLP solutions for inclusive digital access. Experienced in full-stack web development, building production-ready MNC dashboards and robust backend systems with API integration. Proficient in front-end programming and advanced database management to transform complex data into actionable business intelligence.

PROFESSIONAL EXPERIENCE

AT&S Austria Technologie & Systemtechnik (Malaysia) <i>IT INTERN - OPERATIONS</i>	07/2025 – 10/2025 Kulim
• Built dashboards and reports using Power BI (DAX & M code) • Automated tasks and developed templates using Excel VBA • Supported data analysis, visualization, and process automation • Assisted in data management and development of digital solutions • Managed and queried SQL databases for data analysis and reporting	

EDUCATION

Multimedia University <i>Bachelor of Computer Science (Honours)(Data Science)</i> CGPA : 3.52	08/2023 – 07/2026 Cyberjaya
Multimedia University <i>Foundation in IT, Information Technology</i> CGPA : 3.52	08/2022 – 07/2023 Cyberjaya

SKILLS

• PowerBI	• LangChain	• FastAPI
• Deep Learning	• Advanced Database	• Computer Vision
• API Integration	• n8n Automation	• Natural Language Processing
• Model Optimization	• Project Management	• Feature Engineering

CERTIFICATES

• AWS Educate Machine Learning Foundations	• Microsoft Power BI Data Analyst Associate	• IBM MQ Developer Essentials
• Advanced NLP with Python for Machine Learning	• Huawei HCIA-Cloud Computing V5.5	• Microsoft Azure AI Essentials Professional Certificate by Microsoft and LinkedIn

PROJECTS

Deepfake Detection Using Machine Learning Models Achieving 98.05% accuracy, this framework utilizes a Dual-Stream Hybrid CNN with RNN, LSTM, GAN, and Transformers to identify spatial artifacts and pixel inconsistencies in synthetic imagery.	11/2025 – 01/2026
Online Tutor Booking System This Flask and SQLAlchemy prototype streamlines student-tutor connections through a centralized interface featuring real-time filtering, profile browsing, and automated lesson scheduling	01/2025 – 03/2025
The Inclusive Citizen- Multilingual AI for Public Services A FastAPI-powered NLP application leveraging the SEA-LION dataset to provide a multilingual chatbot that enables under-represented ASEAN communities to access public services in regional dialects.	02/2026 – 02/2026
SmartStock AI A FastAPI and React.js decision support system that optimizes SME inventory through AI-driven demand forecasting and transparent, data-driven procurement recommendations.	04/2026 – 04/2026
